# Preface

The Bachelor of Arts, BA (Hons.) in Music – Vocal, program at Maharajas College Ernakulam, provides a comprehensive and thorough foundation in theoretical and practical aspects of Indian classical music especially in Carnatic music. This program is designed for students who are passionate about music and who wish to develop their musical skills, knowledge, and creativity. This will prepare the stakeholders for success in a variety of musical fields and it covers a wide range of topics, including the theory and practice of Carnatic music.

Carnatic music, which is one of the two main subgenres of Indian classical music has a complex and sophisticated tradition with a rich history dating back to ancient times. It is based on a system of Ragas and Talas which is characterized by its emphasis on improvisation and ornamentation. Students who graduate from the program will have a deep understanding of one of the world's oldest and most beautiful musical traditions. They will also develop strong musical skills that will allow them to pursue a career in music or music education. Additionally, studying music can help students to develop their creativity, discipline, and self-confidence along with the opportunity to perform in a variety of settings, including recitals, concerts, and workshops.

The program is introduced in conformity with the system of outcome-based education. The program will have two broad pathways: (a) a three year UG degree and (b) four-year UG degree (Hons) with Research with four major segments: foundational segment consisting of AEC (Ability Enhancement Courses), SEC (Skill Enhancement Courses), VAC (Value-Added Courses) and MDC (Multi-Disciplinary Course); major segment consisting of DSC (Discipline Specific Course) and DSE (Discipline Specific Elective) apart from the signature research segment consisting of Project, critical thinking, methodology courses for research, internship and field surveys and the minor segment comprising courses from allied disciplines to foster interdisciplinary perspectives

**Three-year UG Degree:** Students who wish to exit after three years of a four-year degree program will be awarded UG Degree in the Major discipline after successful completion of three years, securing specific number of credits (133 or above), and satisfying the minimum course requirement as given in tables. Above the required minimum of 133 credits in the three-year UG program, the students can earn up to 47

credits from online courses to achieve a maximum of 180 credits.

**Four-year UG Degree (Honours):** A four-year Degree (Honours) in the major discipline will ensure that the student is capacitated with the ability to pursue Research in the field of interest in Music and also provides him a fertile potential to become a successful performer. This course also envisages multi-dimensional scope, such as academic qualifications, Musicological skill, Researcher, Performer, Insightful approach to sound engineering, Musicology or Music therapy etc. The student will be awarded a four-year degree program with the specific number of credits (177 or above) and satisfy the minimum course requirement as given in tables. Honours students have the option to undertake a project of 8 credits in the Major discipline in their fourth year of the program. Honours students not undertaking project will do 2 courses of total 8 credits in lieu of a project.

**Four-year UG Degree (Honours with Research):** Students who secure 75% marks and above cumulatively in the first six semesters, and are highly motivated to opt research as their carrier, can choose Honours with Research stream in the fourth year. They should do a mandatory research project of 12 credits in the Major discipline in the fourth year under the supervision of a faculty member with PhD degree. The centre, where the student undertakes the research project, should either be an approved research centre of the university or higher education institution (HEI), or obtain prior approval from the university for conducting UG Honours with Research program. The students, who secure minimum 177 credits, including 12 credits from a research project/dissertation, are awarded UG Degree (Honours with Research). The Major courses and Minor courses give equal importance for the performance as well as the theoretical side of the subject. The Skill enhanced courses offered will function as catalyst in making the core courses. Multi-disciplinary courses are designed to infuse interest in the subject among students belonging to other areas of learning. The scheme and syllabus of the curriculum covered will lead the learner to the essence of the subject in graduate level and also help them to acquire knowledge with the up-to-date demands of the field of music. The Department of Music is indebted to MG University for the framework and guidance in forming and structuring the course

### Pages

Project of minimum 60-90 pages shall be prepared and submitted under a Supervising Guide having the qualification, Ph D

### The title of a project

The title of a project is of ultimate importance. Titles must be attractive and exciting at the same time. The title must convey the meaning, the area of intervention and the goals of the project while being enticing

### Order & Content

- Preliminary Pages - The title of the dissertation should be a meaningful description of the content of the dissertation
- Signature Page - The dissertation should be signed by the student and the supervisor. All signatures on the signature page must be original. However, if a faculty member is unable to sign in person, submissions with digital signatures may be permitted
- Abstract of no more than 250 words
- Acknowledgments
- Table of contents, with page references for section headings

### Text

#### a. Introduction

- Literature review* - a survey of scholarly sources related to the research question, as a means of situating the research work in relation to existing knowledge, combining both summary and synthesis.
- Main body*, with the larger divisions and more important subdivisions indicated by suitable, consistent headings.

### Results and Discussion

This could also be in one or more chapters. Based on the analysis and interpretation of data and results, major findings should be pointed out

unambiguously.

### **Findings, Conclusions and Recommendations**

Conclusions are to be drawn with reference to the previously stated objectives of the project. This should highlight the major results.

### **Appendices**

Appendices may be provided to give supplementary information, which is included in the main text may serve as a distraction and cloud the central theme.

### **Bibliography or List of References**

The listing of references should be typed below the heading 'REFERENCES' in the order in which they appear in the work.

### **Margins**

All margins, including left and right, top and bottom, must be one inch

### **Spacing**

One and a half or double spacing is required in the main body of the dissertation except where conventional usage calls for single spacing; e.g., footnotes, indented quotations, etc.
